We do not offer for sale any mixtures which are not worthy to be called grass seed. In order to assure the highest quality all ingredients are chosen having high purity and germination. No lot of seed is used until we have a certificate of analysis from a competent, impartial laboratory. No timothy, meadow fescue or cheap fillers are used, and the percentage of ryegrass is kept low. The result is grass seed with a low percentage of inert matter, weed free, and of high viability. It is packed in attractive bags of excellent quality, to stimulate your sales. Those who know grass seed recognize the high quality of this merchandise. Complete analysis of any mixtures sent on request.
